---

Senior Software Engineer focusing on full-stack with nine years of experience in guiding the product cycle from design to deployment at a high-growth technology startup.

---

## PROFESSIONAL EXPERIENCE

---

**Datto, Inc.** Senior Software Engineer Oct 2017 – Nov 2022

- Developed dozens of pages across our entire product lineup in an agile scrum team.
- Increased performance of our web application by 100%.
- Extended our SSO system to support multiple accounts per user for 100k users.
- Migrated a monolithic application to a highly-available and load balanced system.
- Improved release productivity for our department of 70+ engineers by upgrading our monitoring system to a modern, DataDog APM-based system.
- Collaborated with and advised a plethora of other teams across product, software, infrastructure, sales and marketing to achieve stakeholder goals.
- Mentored countless team members across all skill levels through over 4 product launches.

**Datto, Inc.** Systems Engineer II Feb 2015 – Oct 2017

- Co-designed a Datacenter Management system to manage a fleet of over 2k servers.
- Implemented dozens of internal tools to assist the infrastructure department of 50+ people in reporting on fleet health.
- Designed an Asterisk-based cross-office call system serving 2.2k+ internal employees with ActiveDirectory integration and Polycom phone management features.

**Datto, Inc.** Lead Generation Specialist Nov 2013 – Feb 2015

- Served as the internal developer for the sales and marketing teams.
- Designed a Google Chrome extension to identify leads present in our database.
- Designed and iterated on several pages to gamify and motivate the lead generation team.
